mkdir libraries

mkdir output

mkdir plots

mkdir data

download WASP14 data from Gully's Starfish data and put it in data/WASP14 (should be in HDF5 format)

obtain the "config.yaml" file from Starfish/Starfish/ or other sources

3. Funeral

Now a workplace is established, then we need to compile the "config.yaml" file. See Note: 1. Test Example-WASP14: II. Compile config.yaml for WASP14.
